

# One System that will Never Crash

**It seems** everyone's gearing up for Y2K. But at the Catholic Health Care System, we're getting ready for one of our own. That's because the millennium marks the 2,000th year of the Catholic health care mission.

Can our System handle it? You bet. That's because it's based on our age-old tradition of compassionate, high-quality care for everyone. In fact, we've just strengthened it by coming even closer together. No longer just a network, the new CHCS can deliver health care to the communities we serve like never before.

Our hospitals, nursing homes, and affiliated health care providers are dedicated to providing care to the whole community and the whole person. It's our mission as much as it is our business.

So when you think of the best in health care, think of the Catholic Health Care System. Our system's been up and running for 2,000 years.

CHCS members include Calvary Hospital (Bronx), Our Lady of Mercy Medical Center (Bronx), St. Agnes Hospital (Westchester), St. Clare's Hospital and Health Center (Manhattan), Carmel Richmond Nursing Home (Richmond), Ferncliff Nursing Home (Dutchess County), Kateri Residence (Manhattan), Mary Manning Walsh Home (Manhattan), St. Teresa's Nursing Home (Orange County), St. Vincent de Paul Residence (Bronx), Terence Cardinal Cooke Health Care Center (Manhattan) and affiliate health care facilities and providers.
